Rhode Island Woman Says Confidence in Dr. Williams' Pink Pills Was Justified.

A tonic that strengthens, that revives the appetite, brings color to the cheeks and revitalizes the nerves is what many tired women need to restore them to the normal condition of activity and attractiveness. Mrs. Beatrice Stott, of No. 56 Watson street, Central Falls, R. I., relates her experience with such a tonic as follows:

"I had a severe attack of pleurisy that left me in a terribly run-down condition. My blood was thin, I was pale, my appetite was poor, and I had but little strength. I had severe pains in my side, and my rest was broken at times from nervousness. I tried different preparations, but the medicines did not seem to help me.

"I had heard of Dr. Williams' Pink Pills when I lived in England and finally decided to give them a trial. After the first box I was much better, and I noticed an improvement in my appetite. I continued to use the pills and they gave me more strength. I used three boxes altogether, and the results were so satisfactory that I have recommended the pills to others. I have faith in Dr. Williams' Pink Pills and am glad to say a word of praise for them."

Dr. Williams' Pink Pills are sold by all druggists, or direct from the Dr. Williams Medicine Co., Schenectady, N. Y., at 30 cents per box, six boxes for \$2.50, postpaid, on receipt of price. Write for the free booklet, "Building Up the Blood."—Adv.

While in the service he received several serious shrapnel wounds that disabled him for several months, so while in Montreal he plans to receive further treatment at the expense of the Canadian government.

Frank Cassiva, local yardmaster of the Central Vermont railway, was able to be downtown today with the aid of crutches. Two weeks ago the wrecking car and the 40-foot extension derrick that was about to remove a damaged flat car from the truck turned over on its side. Fifteen workmen standing thereabouts scattered in all directions to escape the steel derrick. Mr. Cassiva happened to be standing on the car that overturned, and when he jumped to be clear of the falling derrick, struck his hip upon a steel rail. A rather bad injury to his hip was sustained that has necessitated his confinement to the house ever since.

Don't Take any Chances

A battery may seem to be doing its job nearly as well as usual—may turn the engine over strongly enough to "get by"—may supply enough current for light—may produce a fairly hot spark—and may go on doing so right up to the point where the spark of life goes out.

If you don't know that your battery's in good health, you're taking chances.

Drop in at the Service Station for ten minutes and let us test your battery.

And ask about the Still Better Willard—the only battery with the "Bone Dry" principle that is your absolute assurance of getting a battery as new as the day it left the factory.
